Art Unit: 1648

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-78, drawn to chimeric hepatitis B proteins and particles comprising chimeric hepatitis B proteins, classified in class 530, subclass 350.
- II. Claims 79-97 and 110-115, drawn to vaccines and methods, classified in class 424, subclass 191.1.
- III. Claims 98-109, drawn to nucleic acids, vectors, and host cells, classified in class 536, subclass 23.72, e.g.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Group I can be used in a materially different process of using such as in affinity purification of hepatitis B core antibodies.

Inventions I and III and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions need not be used together, since Invention I does not require the use of Invention III, because the proteins can be made

Art Unit: 1648

by chemical modification of proteins isolated from natural sources. The vaccines and methods of Invention II do not require the products of Invention III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for any one group is not coextensive with the search required for either of the other groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donna C. Wortman, Ph.D. whose telephone number is 703-308-1032. The examiner can normally be reached on Monday-Thursday, 7:00-5:30.
